The purpose of this modification is to issue a change order revising the Statement of Work (SOW), and to make certain changes to the contract terms associated with the revised SOW. These revisions are being made under the authority of the contract clause contained in Section I, Clause I.85 Changes – Costs Reimbursement (Aug 1987) Alternate III (Apr 1984). The contractor is to begin work immediately. The contractor is authorized to incur cost Not – to – Exceed (NTE) \$30,000.00, consistent with the other contract terms and conditions and pending definitization of this change.

1. Section B, Supplies or Services and Prices/Costs is modified as follows:

A. Paragraph B.1 is modified to add the following:

The contractor shall, in accordance with the terms and conditions of this contract, provide the personnel, materials, supplies and services and do all things necessary for, or incidental to, performing the changed work. The detailed description of the changed work is contained in Section C of this modification.

B. Paragraph B.4 is modified to add the following:

No Fee shall be paid to the contractor for the work under this change order (Mod 095) for the changed work including provisional fee, prior to definitization.

2. Section C, Description/Specification/Work Statement is modified as follows:

Section C, paragraph C.5 (g) is modified to add the Waste Transfer Line Design Pressure Change:

Added: Waste Transfer Line Design Pressure Change Scope of Work

SCOPE OF WORK

This scope of work involves the change in the design pressure of the Waste Transfer line pressure.

REQUIREMENTS

Presently line 3"-HLW-0001-PS200D (Waste Feed Line from the Tank Farm to SWPF) and 3"-AQU-6585-PS200C (Spare Waste Transfer Line) have a design pressure of 150 psig.

Per SRR-ORG-2011-00020, Parson is directed to revise the design pressure for these two waste transfer lines to 250 psig, which is the maximum design pressure supported by the existing calculation (P-CLC-J-00124 Revision 0). This will require Parsons to update the design documents (e.g. line list) for these lines to document the revised design pressure and to retest any sections of the lines that were previously tested based on the lower design pressure.

Note: This action is being taken based on the memo received from SRR to DOE on the Tank 49 Pressure requirements, dated June 2, 2011, Document # SRR-ORG-2011-00020, Rev.2 (See Attached)

3. Section F, Deliveries or Performance, clause F.1 is modified as follows:

The period of performance for the changed work specified in Section C, paragraph C.5 (g) shall be for the period of performance beginning with the date of the signed modification through Jul 11, 2012.

4. Section G, Contract Administration Data is modified as follows:

The contractor may invoice costs for both changed work and other work in the same invoice. However, the contractor shall separately identify costs in its invoices that pertain to the changed work until the parties agree to an equitable adjustment for the changes ordered by the Contracting Officer.

5. The following is a definitization schedule for this change order.

This schedule applies only to the changed work specified in Section C as directed by the Contracting Officer under this modification in accordance with the clause in Section I, entitled "Changes – Costs reimbursement (Aug 1987) – Alternate III (Apr 1984)," until such time that the Contracting Officer and the contractor reach a mutual agreement and modify the contract definitizing the changed work.
