**14. Statement of Work (Includes attachments)**  
 Current period work scope includes the receipt, storage and disposal of legacy and newly generated Low Level Waste (LLW), Low Level Mixed Waste (LLMW), Transuranic (TRU) waste, HW, Pipe Overpack Containers (POCs) from HB-Line, and sanitary waste. The DOE-SR Pollution Prevention (P2) Program employs the EM's preference of source reduction and recycling over treatment, storage and disposal and the preferred use of energy-efficient and resource-conservative practices and operations. Surveillance and maintenance activities for the Consolidated Incineration Facility will continue through FY 2013, at which point decommissioning will commence.

This current period work scope also includes capital type projects (capital equipment and general plant projects) executed by Infrastructure Services to support facilities and activities, and support for the Historic Preservation program. Funds authorization is in accordance with the DOE-SR Fin Plan. A more detailed description of the work scope can be reviewed in the SRNS FY 13-17 CPB once change requests are approved by DOE-SR.

All work shall be conducted in accordance with this Modification.

**14. Statement of Work (Includes attachments)**  
The S&S Program provides technical support and documentation to manage an integrated system for the protection of nuclear materials, classified information, Site property and personnel. The Nuclear Material, Control and Accountability (MC&A) Program ensures SNM accounting in accordance with DOE requirements and supports ongoing and new risk reduction, material consolidation and nuclear material hold up removal activities (e.g., residual materials in process equipment). These activities provide assurance that SNM is properly controlled and accounted for at all times. The Information Security Program ensures that material and documents that may contain sensitive or classified information are identified, reviewed, appropriately marked and protected from unauthorized disclosure and ultimately destroyed in a timely manner. The Personnel Security Program encompasses those activities necessary to ensure only authorized personnel access the Site and ensure adequate control for areas within the Site. The Cyber Security Program ensures the protection of sensitive or classified information that is electronically transmitted.

Funds authorization is in accordance with the DOE-SR Fin Plan. A more detailed description of the work scope can be reviewed in the SRNS FY 13-17 CPB once change requests are approved by DOE-SR.

All work shall be conducted in accordance with this Modification.
