STANDARD FORM 30 (REV. 10-83)
Prescribed by GSA
FAR (48 CFR) 53.243

SF30 Block 14

The purpose of this modification is to issue a change order revising the Statement of Work (SOW), and to make certain other changes to the contract terms associated with the revised SOW and supersedes Contract Modification 001 with respect to work performed under this change order. These revisions are being made under the authority of the contract clause contained in Section I, entitled "Changes – Cost Reimbursement (Aug 1987) – Alternate II (Apr 1984) & Alternate III (Apr 1984)." The contractor is to begin work immediately. The contractor is authorized to incur costs Not-To- Exceed (NTE) **$8,000,000.00**, consistent with the other contract terms and conditions and pending definitization of this change.

1. Section B, Supplies or Services and Prices/Costs is modified as follows:

A. Paragraph B.1 is modified to add the following:

The contractor shall, in accordance with the terms of this contract, provide the personnel, materials, supplies, and services and do all things necessary for, or incidental to, performing the changed work. The detailed description of the changed work is contained in Section C of this modification.

B. Paragraph B.3 is modified to add the following:

No fee shall be paid to the contractor for work under this change order (Mod 071) for the changed work including provisional fee, prior to definitization.

2. Section C, Description/Specifications/Statement of Work is modified as follows:

A. Section C is modified to add the Supplemental Salt Processing Initiative Scope of Work to the Overview of the Contract Workscope (page C-2) as follows:

Added: ARP/MCU Life Extension Fabrication and Installation

Design support for the ARP/MCU Life Extension includes necessary design activities to specify equipment and detailed changes to extend the operational life of the ARP/MCU and to conduct demonstrations of the Next Generation Solvent (NGS) and modified monosodium titanate (mMST). The scope of work does not include Title III Design activities during the construction phase.

The following design activities support ARP/MCU Life Extension:

- Design services required to support design which includes all research and development (R&D), testing, and operation activities required to demonstrate compatibility and performance capabilities of the next generation solvent (NGS), modified monosodium titanate (mMST), and in-line solvent monitoring technology.
- Design services support for ARP/MCU Life Extension facility modifications to relocate the ARP monosodium titanate (MST) chemical addition equipment within the 241-96H building on an interim basis.
- Design services support for ARP/MCU Life Extension In-Line Monitoring for ISOPAR which includes special materials associated with the design of the MCU in-line ISOPAR monitoring system.
- Design services support for ARP/MCU Life Extension MCU next generation solvent implementation to demonstrate the effectiveness of a modified solvent in providing improved performance characteristics.
- Design services support for ARP/MCU Life Extension Piping Modifications for Operations Recovery which includes design for piping modifications required to establish transfer paths to enable recovery from process upsets in order to mitigate risks associated with the NGS demonstration and reduce/minimize impact on subsequent operations.
- Design services support for ARP/MCU Life Extension SE and DSS Coalescer Modifications which will include redesigning the coalescers to enable remote change-out.
- Design services support for 512-S Life Extension Facility Modifications to relocate the ARP chemical addition and strike functions from the 241-96H building to building 512-S.
- Design services support for DWPF modifications required as a result of the new solvent/strip acid implementation at MCU and the modified MST (mMST) implementation at 512-S. It includes design activities required to make modifications to the DWPF to install a boric acid addition system with associated jumpers to accommodate chemical changes in waste feed.

In addition to the specific design activities identified above, the scope of work also includes design-related program support activities involving managing and monitoring execution of the design work and support of long lead procurement and other than design consent packages. Such activities include project management, project controls, quality assurance, design authority support and design input, ES&H support (including safety basis reviews) and design input, construction services support and design input, and waste determination/regulatory support and design input. Design-related laboratory support services acquired from SRNL and/or other specialized laboratories are also

included where applicable. The scope also includes any external reviews to the extent required and ancillary facility support where applicable. Associated design-related travel and other direct cost for materials and supplies are similarly included within this design scope.

Final design associated with ARP/MCU Life Extension and BGS implementation at ARP/MCU and DWPF to support fabrication and construction, with the exception of design pending from procurements, is scheduled to complete August 31, 2011. Final design to implement mMST striking capability at 512-S to support fabrication and construction, with the exception of design pending from procurements, is scheduled to complete September 30, 2012.

3. Section E, Inspection and Acceptance is modified as follows:

Remains unchanged.

4. Section F, Deliveries or Performance, clause F.2 is modified as follows:

The period of performance for the changed work specified in Section C shall be for the period of performance beginning with the date of the signed modification through the dates identified in Item 2, Section C above.

5. Section G, Contract Administration Data, clause G.7 is modified as follows:

The contractor may invoice costs for both the changed work and other work in the same invoice. However, the contractor shall separately identify costs in its invoices that pertain to the changed work until the parties agree to an equitable adjustment for the changes ordered by the Contracting Officer.

6. The following is a definitization schedule for this change order.

This schedule applies only to the changed work specified in Section C as directed by the Contracting Officer under this modification in accordance with the clause in Section I, entitled "Changes – Cost Reimbursement (Aug 1987) – Alternate II (Apr 1984) & Alternate III (Apr 1984)," until such time that the Contracting Officer and the contractor reach a mutual agreement and modify the contract definitizing the changed work.

MODIFICATION DEFINITIZATION

(a) The Contractor agrees to begin promptly negotiating with the Contracting Officer the terms of a definitive modification for the changed work directed

under this modification. The Contractor agrees to submit an REA (technical, cost, and fee proposal) in accordance with the instructions provided in modification 007.

(b) The schedule for definitizing this modification is as follows:

Milestone	Date
Contractor submits REA (technical, cost and fee proposal)	Mar 15, 2011
Commence Negotiations	May 16, 2011
Mutual agreement on definitization of changed work	Jun 16, 2011
Contractor submits certificate of current cost or pricing data	Jul 15, 2011
Execute definitization contract modification	Jul 27, 2011

(c) If agreement on a definitive modification is not reached by the definitization date in paragraph (b) of this section, or within any extension of it granted by the Contracting Officer, the Contracting Officer may, with the approval of the head of the contracting activity, determine a reasonable price in accordance with Subpart 15.4 and Part 31 of the FAR and Acquisition Guide 15.4-1, subject to Contractor appeal as provided in the Disputes clause. In any event, the Contractor shall proceed with completion of the contract, subject only to the clause in section I, entitled "Limitation of Government Liability," added by this modification.

7. In reference to this change order, incorporate clause FAR 52.216-24 Limitation of Government Liability (Apr 1984)

Limitation of Government Liability (Apr 1984)

(a) In performing this contract, the Contractor is not authorized to make expenditures or incur obligations exceeding $8,000,000.00 dollars.

(b) The maximum amount for which the Government shall be liable for this contract modification if this contract is terminated is $8,000,000.00 dollars.

(End of clause)

8. FAR 52.243-6 Change Order Accounting (Apr 1984) is hereby invoked.

9. Section J, List of Attachments is modified as follows:

Remains unchanged.

10. All other terms and conditions remain unchanged.

SRR Management Delegation of Authority

History: This message has been forwarded.

I will be away on extended business travel for the next few weeks. I will update my Delegation of Authority to the Executive Team at the end of February. From February 7 through 28, the following managers will cover as listed below. This will allow the SRR executive team to maintain business continuity and focus on safe operations and project performance.

- Dave Olson will have my signature authority and serve on my behalf. Dave may be reached at 803-208-2910 or cell phone 803-645-0851.
- Wyatt Clark will cover for Dave Olson for the office of Operations and Deputy Project Manager. Wyatt may be reached at 803-208-3205 or cell phone 803-646-8947.
- Mike Borders will cover for Wyatt Clark for Tank Farm Operations Project Director. Mike may be reached at 803-208-8592 or cell phone 803-646-8960.
