**1. Section C, Description/Specifications/Statement of Work is modified as follows:**

A. The following is added to paragraph C.1.3.1:

**"Modification to H-Retention Basin.**

Physical modification to the H- Retention Basin (HRB) discharge line will involve installation of a manhole between the HRB and the ETP treated water line located south of E-Road. This manhole (with installed valves) will allow the option of routing the basin discharge to either the H-12 or H-16 outfall depending on the zinc concentration in the HRB. Modifications to the current process configuration will require installation of a second treated water discharge sampling station. Modifications to the HRB discharge pump and the treated water line backpressure valve to accommodate either reduced or increased flow may have to be made. Pressure testing also will be required after the construction completion of the tie-in to the ETP treated water line.

This change would ensure regulatory compliance with the pH and metals (zinc) limits for the H-12 NPDES outfall expected in the anticipated revision of the SRS NPDES industrial wastewater permit, starting May 2013. Compliance will be required on the date the permit is revised."

**2. Section E, Inspection and Acceptance is modified as follows:**

(e) The Contractor may invoice costs for both the changed work and other work in the same invoice. However, the Contractor shall separately identify costs in its invoices that pertain to the changed work until the parties agree to an equitable adjustment for the changes ordered by the Contracting Officer per Modification 217.
